ENGINEERING EXCELLENCE IN EVERY BEAM.

Your vision Our steel. Limitless possibilities.

- Optimized Engineering
- Rapid Project Delivery
- Unmatched Durability

1998
Steel supply & roofing.

2012
Entry into civil & PEB.

2015
Full-fledged PEB projects

2023
Major industrial projects

2025
Scaling pan-India

OUR COMPANY

MBS
ROOFING & PRE ENGINEERED BUILDING
Strength in Structure, Elegance in Design

MBS Roofings, a proud subsidiary of the MBS Group, has been a trusted name in the steel industry since 1998. Founded by Mr. Byre Gowda with his passion for precision steel solutions has steadily evolved into a benchmark for quality and reliability in civil construction and pre-engineered buildings (PEBs).

In 2010, Mr. Manjunath H.B., the son of Mr. Byre Gowda, joined the business, bringing a new wave of energy and strategic vision. By 2012, he spearheaded the company's foray into infrastructure development, laying the foundation for a new era of smart, scalable,and future-ready construction solutions.
Under their leadership, MBS Roofing has become a leading name in customized PEB solutions, completing over 10 lakh sq. ft. of godown space — including 4 lakh sq. ft. of self-owned infrastructure. Beyond building structures, the company is known for the strong relationships it builds with clients, partners, and communities.

PROVEN. MEASURED. DELIVERED.

- 25+ Years of Steel Legacy
- 350+ Trusted Clients
- Executed Projects Across Karnataka
- Handling 1500 MT Steel Tonnage Monthly

OUR VISION

To be India's most trusted and innovative partner in pre-engineered buildings delivering quality, speed, and sustainability in every structure we create.

MISSION

To engineer smart, scalable, and sustainable building solutions through excellence in design, fabrication, and on-time delivery — empowering industries across India.

MBS
ROOFING & PRE ENGINEERED BUILDING
Strength in Structure, Elegance in Design

WHAT IS A PRE-ENGINEERED BUILDING (PEB)?

A Pre-Engineered Building (PEB) is a steel structure designed and fabricated in a factory and then assembled on-site. Every component—beams, columns, and panels—is pre-designed and pre-manufactured to fit together perfectly, making construction faster, more efficient, and highly customizable.

PEBs are widely used in warehouses, factories, commercial buildings, and infrastructure projects due to their strength, flexibility, and cost-effectiveness.

PEB SECTORS WE MASTER

Industrial Sheds

Warehouse

WHY MBS OVER COMPETITORS?

Unlike many others, MBS combines cutting-edge technology with deep industry experience to deliver high-quality PEB solutions — faster and more cost-effectively. While competitors may offer standard designs, we focus on custom-built structures tailored to your exact needs. With superior materials, quicker timelines, better value engineering, and unmatched customer support, MBS stands out as the smarter choice for future-ready infrastructure.

At MBS, we engineer more than steel structures — we shape the future of industry, warehousing, and infrastructure. With cutting-edge PEB solutions and a commitment to quality, we deliver faster, smarter, and stronger buildings that last generations.

OUR PRODUCTS PORTFOLIO

To complete your roofing system, we provide a full suite ofroofing accessories, ventilation systems, insulation materials, mezzanine flooring options, and skylight solutions—all designed to enhance structural efficiency, energy conservation, and interior comfort.

Whether you're building from the ground up or upgrading an existing facility, MBS Roofings stands as your reliable partner for precision-crafted, cost-effective, and sustainable PEB solutions.

01

STRUCTURE

Core Structure
Components

02

PURLINS

High-Strength Purlins for Roofing Support

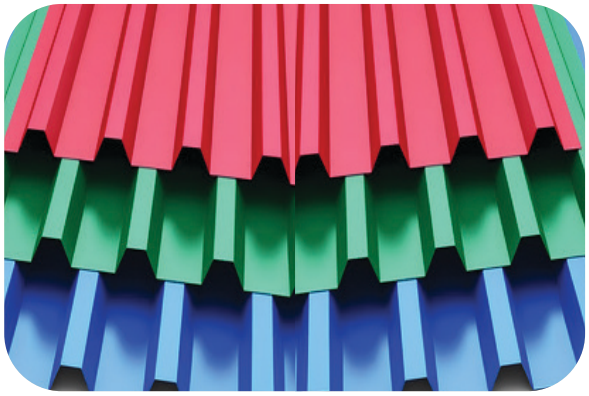

- "Z & C" - Lightweight & versatile for fast installation
- Sigma - Enhanced stiffness for longer spans
- Box - Closed section for superior torsion resistance

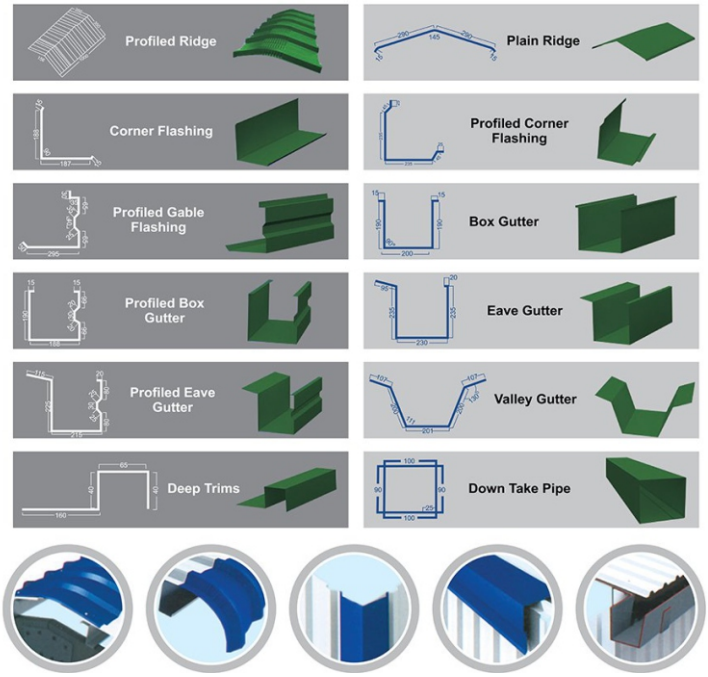

03

COMPLETE ROOFING SYSTEM

ROOFING SHEETS

- Colourcoated (PPGI/PPGL/Bare)

MBS
ROOFING & PRE ENGINEERED BUILDING
Strength in Structure, Elegance in Design

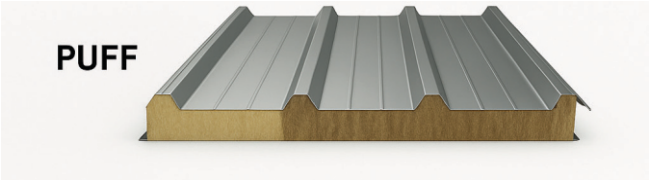

ROOFING ACCESSORIES

ROOFING SHEETS

- Ridge Flashing, Gable Flashing, Gutter System, Drain Pipe
- Edge and joint protection: Drip, Eaves, Apron, Reverse Flashing
- NLC – Northlight Curve for natural light with design

04

EFFICIENT THERMAL & SOUND INSULATION OPTIONS

INSULATION

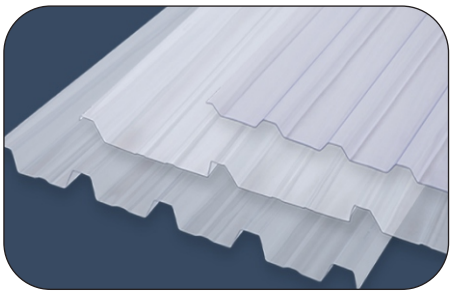

- Puff, Rockwool, Glasswool – Thermal & Fire Protection
- XLPE & Bubble Insulation – Lightweight reflective solutions

05

ENHANCEMENTS & ADD-ONS

Skylight Panels

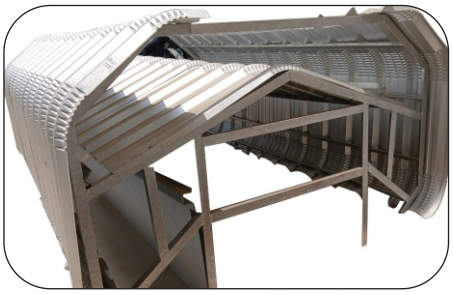

- Polycarbonate: High clarity, impact resistance
- FRP: Diffused lighting, durable

POLYCARBONATE ROOFING SHEET

Mezzanine Floor

- Deck Sheet: Load-bearing base
- Chequered Plate: Durable, anti-slip surface

RIDGE MONITOR

Ventilation Systems

- Turbo Ventilators, Louvers, Ridge Vents
- Ensure optimal airflow & reduce heat buildup
